NOTES; The 8BA-350 comes drilled for the Ford small block bellhousing bolt pattern. The flex plate is manufactured by Wilcap. The adapter can use the stock Ford small block starter but it will require that the engine block be modified. Alternatively, we can supply a mini starter that requires no modification of the block. Complete instructions are included for installing the adapter. We do not supply information regarding engine or transmission installation in to specific frames, bodies, etc. This is the responsibility of the customer and care should be taken to address the issues of motor and transmission mounts, driveline, body and frame clearance, gear ratios, etc. BEFORE the purchase of the engine to transmission adapter. We can assist you with information and dimensions prior to the start of your project so feel free to contact us with any questions.
