

CUSTOM ENGINE TO TRANSMISSION ADAPTERS

DON'T SEE WHAT YOU NEED? We are always willing to look at any idea you might have to adapt an engine to a transmission. This Includes;

Custom Adapter Plates either engine block to bellhousing or bellhousing to transmission case.

Custom Flywheels Thicker cross section, larger or smaller diameters, different ring gears, different clutch patterns and configurations.

Custom Flexplates We have the tooling and the knowledge to manufacture "dished" or flat flexplates for your custom applications.

Custom Starters We can assemble or make a starter to match your needs using different pitch pinion gears and mounting methods.

Custom Pilot Bearing Adapters Bushings, roller bearings, or needle bearings, we can make a pilot bearing for your application

We supply other adapter manufacturers with parts for their kits and we can help you make your project happen.
